

ICA 37th Conference: Second Session

ENTERPRISE ARCHITECTURE

Olav Ostberg
Sweden
Chair

Welcome to the second session of the 37th ICA Meeting. We are now going to have three presentations on enterprise architecture. Yesterday we were on an exercise which showed without doubt that the enterprise architecture is a really hot topic. I have four hot speakers here or is this just in time delivery. I am Olav Ostberg from the Swedish Agency for Public Management and my duty here is to do some public management to get this going. Primarily that means time keeping, so the first thing I have to do is to get out of the way for the presentations. There will be a question and answer period at the end of this session.

The first presentation is from the Government of Canada and they have brought a presentation team consisting of Simon Gauthier, Deputy CIO for Government of Canada and John Weigelt who leads the long term architecture development of Canada team. Simon, John the microphone is yours for 25 minutes according to our service level agreement.

The next speaker is Peter Tan from Government of Singapore, the Chief Information Officer. Peter is a member of the core team that drives the development of the service wide technical architecture. He previously managed the government internet website which two years ago won the first prize in the Stockholm Challenge which we all admired. And I am sure we will all admire your presentation.

The third presentation is from Denmark; Niels Pagh-Rasmussen will introduce us to the Danish national IT architecture framework. Niels is Division Head of the Danish National IT and Telecom Agency. More importantly, perhaps is that he is the chairman of the IT architecture committee in Denmark.
